

PROJECT UPDATE

1/14/2025

Good morning,

This is so exciting that I want to share this photo with you this morning. The new 8" pipe and manhole has been installed. Please note how "dry" this area is to allow for the workflow to proceed with ease. Today they will continue to fill in this area and place the lid on top of the manhole. They will camera the line going directly into the lift station to make sure that all is good there. I will update you again during the day.

Have a great day,

Trish
